

I just heard that the feds are going to enact their own watered down version of the no call act.  
Please don't change the Indiana act! "It works"  
It has been so nice to be able to sit down to dinner without some goober calling to sell aluminum siding for my brick home.  
So please, if you enact a federal level no call law, don't pre-empt Indiana's. Leave the individual states that already have no call laws, that work, alone, Please.

Thanks  
George T. Weissinger
